

2010 SPECIAL OPPORTUNITY FOR YOU TO UPGRADE TO DIPLOMA OF REMEDIAL MASSAGE (HLT 50307)

Dear Practitioner,

We hope this letter finds you in good spirits. We have been training Massage Practitioners since the early eighties and many years prior to the Government Training Packages for massage being established. Over these years SIBT has awarded varying standards of the Remedial Massage Diploma which reflected what was occurring in the massage profession at that time. If you have graduated from another college we hope to be of assistance to you also as with our lengthy experience we understand the Australian massage profession.

As many will be aware there has been a rising trend in massage qualifications and with this also a higher qualifying level set by leading health funds. This has left many Practitioners unable to offer health fund rebates for massages services to their clients. This trend may expand as other health funds follow.

If you have trained with SIBT or another college we will understand the level of your training and will be able to offer you bridging to the current training package Diploma of Remedial Massage (HLT50307) which is currently accepted by health funds.

We will need to look at each application individually and will waiver the Recognition of Prior Learning (RPL) fee till the end of 2010. If you have completed further training and/or have clinical experience, this may also support your RPL application.

We invite you to call us on **4393 1200** or visit our website **www.massageschool.com.au**. You will see a click through on the home page to "Upgrade 2010 Special Offer" and "Upgrade RPL Info". We are interested in assisting you to complete the upgrade. If you need assistance we are happy to explain the current qualification to you and your options.

We look forward to hearing from you and the opportunity to assist you upgrade to the current Remedial Massage qualification.

Yours sincerely,

Maggie Sands
School Principal, School of Integrated Body Therapy
Managing Director, Lake Spa Wellness Centres
